

Readme

The following document will mainly focus on the client features when the features for server will be in another document.

Features Completed

The most important part of our app is to add markers on the map to show different events/gossips/information. For now we have completed the basic function of this main feature(see the image below). Still we need to optimize the user interface so that it will be easier for the user to classify different notes.

MainActivity

We also completed the following features:

- Login / Register
- Change avatar and personal information
- Sending new note

Features Under Construction

There are still several features under construction

- upload media file (e.g. image)
- The nearby feature
- The detail feature
- Several corner case

Document update

We have update several document via the developing process. The updated version will be in the doc folder
