

Test Document

Login and Register

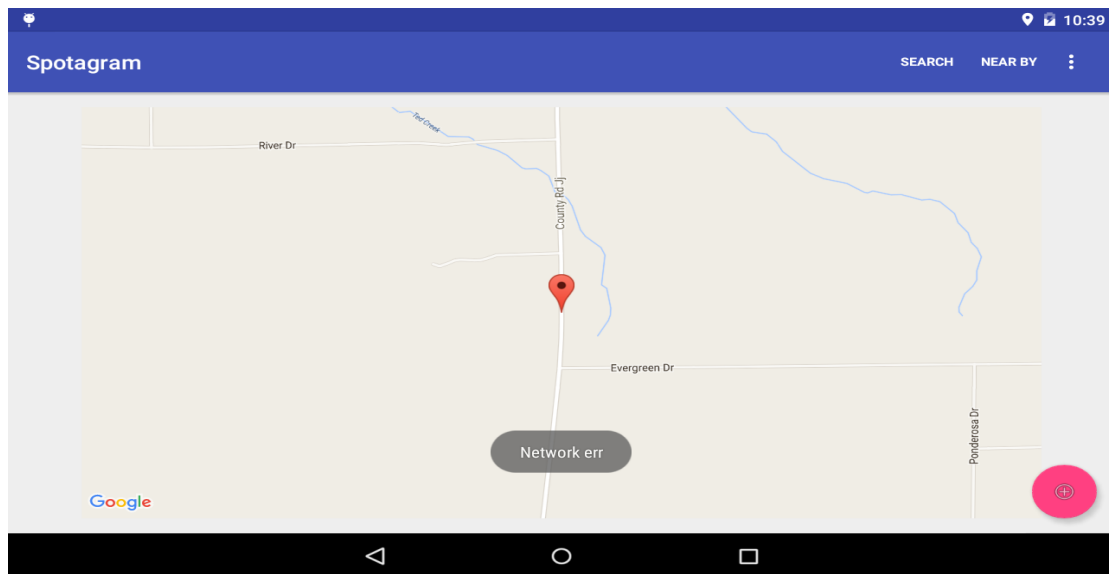

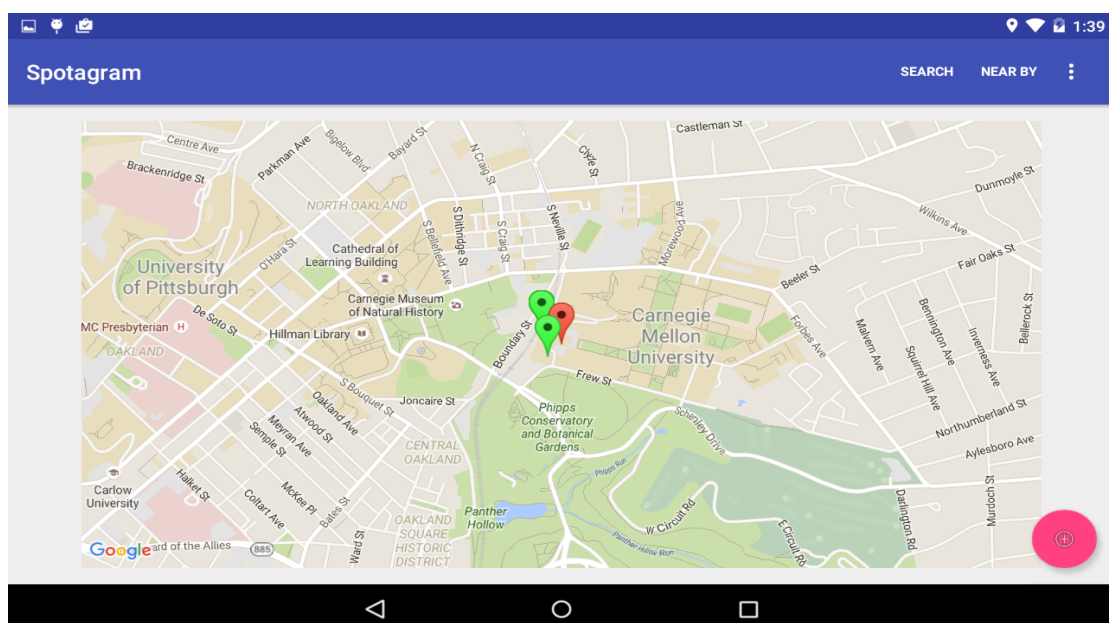

As you can see from the above login pages, we will detect the input from user and check it to ensure right and suitable input. For example, password should be at least 6 characters. Email input should be in a valid email address form. When register, we must input a username, which should also be unique.

Main Page(first Page)

This is the first page (main page) of our App, when we start it.

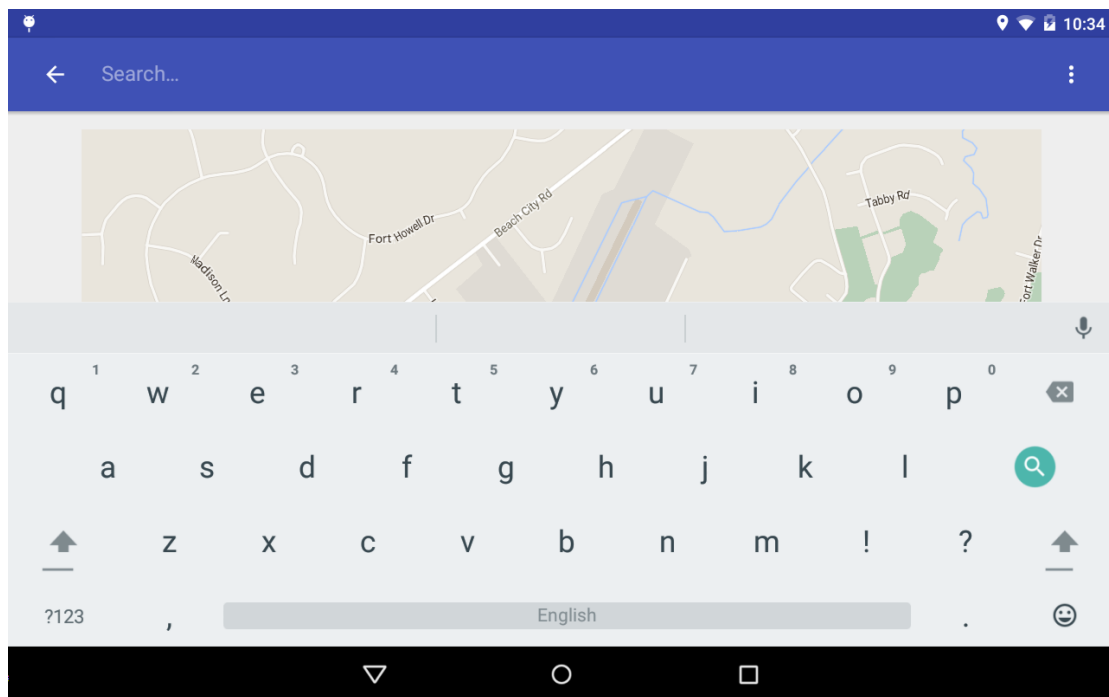

If the some Network problem happens, such as no network. “ Network Err” will be reported like the above figure.

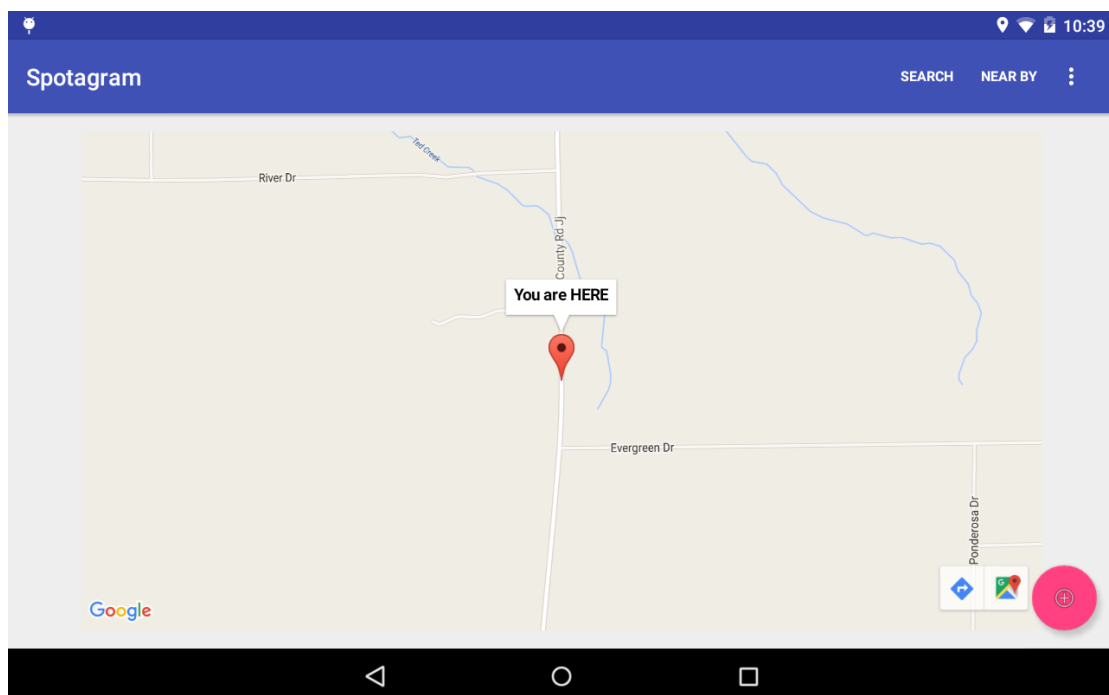

If everything is fine, it show the about page, where the red point indicates where we are, and green points mean the notes posted by others.

Search

1.Input a location you like to search for the notes around this loction.
